Portable

Revolutionizing Cloud Control

The ClearCaster™ Micro is a portable live encoding solution packed with professional features. Ideal for live event producers in the field, the all-in-one Micro provides a reliable, cost-efficient way to stream broadcast-quality video to any destination.

What is Wowza Cloud Orchestration?

Cloud-based control of your entire encoding fleet — from anywhere in the world.

Designed with a cloud-first approach and back-end management, Wowza Cloud Orchestration allows you to take complete control of your entire encoder fleet from anywhere in the world. Prebuilt using proven Wowza technology, Wowza Cloud Orchestration simplifies the most difficult parts of the encoding workflow — saving you time and lowering overhead costs. With Wowza Cloud Orchestration, you can easily manage thousands of streams with a scalable API, or build your own architecture on top of our cloud-optimized back-end infrastructure.

Key Features:

- ✓ User Management
- ✓ Closed Captions
- ✓ Titling and Graphics
- ✓ Multi-Target/Output
- ✓ HEVC
- ✓ SRT
- ✓ Cloud Storage
- ✓ Made for Grab and Go

Cloud-Based ClearCaster™ Manager:

Remote Management

Browser-based control allows for remote management from anywhere.

Streamlined Workflows

Reliably take broadcasts live with just one click.

Multi-User Access

Provide your entire team with access to your encoders.

Health Monitoring

Identify issues quickly and ensure your broadcasts are ready to go live.

Custom Workflows

Build your own encoding workflows and use interface controls.

User Roles and Permissions

Restrict access on certain features to less technical team members.

Graphics Engine

Enable slates, count-down timers, lower-thirds and animated logos on your broadcast.

APIs

Use the GraphQL API to build your own applications utilizing ClearCaster.

Record Management

Immediately access clean recordings of your broadcasts in the cloud.
